Warrior Racing proudly displayed RW-7 and our team’s accomplishments at the North American International Auto Show at Cobo Hall in Detroit. We were able to meet and greet with some of our sponsors, talk with teams from other universities, and share our success with the public. A big thanks to Engine Lab for our backdrop stands and the NAIAS and for sponsoring us!
Meet a Warrior Racing Teammate

Christopher Abbod
Currently pursuing a BS in Electrical and Computer Engineering, Junior Status

A Little About Myself
I have played Classical Guitar for the last seven years and I am learning piano. With the knowledge I have gained from pursing an ECE degree I am attempting to make a guitar amplifier.

Why I Joined Warrior Racing
I was curious and wanted to learn more about how an ECE Major could contribute to the team. I wanted to get the kind of hands on experience that I would be unable to get anyway else.

My Favorite Part About Warrior Racing
Working together as a team to build a working vehicle is amazing and not really something I expected that I would have the privilege of doing. I think so highly of everyone involved in the team and I am so thankful to be able to work alongside them.

Recent Team Activity
I have worked with the team to complete the wiring harness, I’m in the process of making brake lights, and I’m working on the very first Android Based notification system for our car.

Whirlyball Fundraiser
Due to the winter storms that hit Michigan last month our Whirlyball Fundraiser has been rescheduled for February 16th at 6:00. (still at the Whirlyball complex in Novi) Tickets are $25 a person and include 3 hours of court time and plenty of food. This fundraiser not only supports our team but the American Cancer Society as well. If you have any questions please contact Adam Niner at ea9319@wayne.edu. There is a PayPal set up at the bottom of our website for quick payments.
(http://fsae.eng.wayne.edu/)
Hope to see you there!
Recent Sponsor Contributions

North American International Auto Show provided us with a venue to display our team at Cobo Hall. To learn more about the North American International Auto Show, visit their website at www.naias.com/
